515 East Yazoo Street, Jackson, Mississippi

## can you afford not to own your own home?

Some people pay rent most of their lives, convinced they can't afford to buy. Yet, actually, the reverse is true — these families who year after year throw away thousands of rent dollars cannot afford to rent.

Today, almost anyone with a regular income and who wants a home can have one. In recent years, for example, thousands of young families have "scraped up" enough for a down payment on a

modest dwelling. Their monthly payments were frequently less than rent on an equivalent apartment or house. This enabled them to save enough which when added to their "equity" was sufficient to make a down payment on a larger home.

For most persons, buying a home is the best investment they ever make for it pays dividends not only in dollars but, more importantly, in happiness and security.

# Contemporary...

**LONG . . . LOW . . . AND LIVABLE**

MODEL 50 with carport (non-basement)  
(Aluminum fenestration used in Southern Climate.)

Here is a home for the "young in spirit" who like to live comfortably . . . entertain graciously. A ground-hugging beauty, simplicity is the keynote . . . inside and out. Distinctive design features include a low pitched roof, broad expanses of window, and a deep, overhanging roof for protection against sun and weather. Practical in any climate . . . the Contemporary offers the maximum in modern livability.

MODEL 50 with carport  
(NON-BASEMENT)

1120 square feet including storage — 3 bedrooms — choice of exterior treatments including vertical red wood siding and shingles in various combinations and colors. Right and left hand models available.

The sloped ceilings and open planning contribute to the spacious atmosphere of the generous size living room in the Contemporary. Light and airy, because of the large window-wall, there is plenty of unbroken wall space for convenient furniture arrangement. Carefully planned for active family living, it is casual and uncluttered in appearance.

*P*lenty of living area . . . and a place to dine

Dining area convenient to the kitchen is another Contemporary luxury note. Folding bamboo screen closes off kitchen area when desired, and large expanse of windows makes this a bright, cheery spot for dining.

#### FRONT ENTRY HALL CONTROLS TRAFFIC

Charming entry hall is separated from living room by planter. Lined with book shelves and storage units, it leads to kitchen and to hall serving bedrooms and bath. Cross-room traffic through living room is completely eliminated — a work-saver for mother in a family with small children.

## THE CONTEMPORARY ALSO AVAILABLE

### MODEL 65 WITHOUT CARPORT (FULL BASEMENT)

1078 square feet of floor area — including bay in front. Heater and laundry facilities are located in basement and outside storage area has been removed to provide larger rear porch.

## service center for housewives

Plenty of work space in the carefully planned Contemporary L-SHAPED kitchen. 10 feet of formica counter top — a double sink. Cabinets are natural birch with sloping faces and sliding doors. Designed to save steps, you will find this kitchen a joy to work in.

## Snack bar... is an extra bonus

**OUTSIDE STORAGE INSTEAD OF AN ATTIC**  
500 cubic feet of outside storage area eliminates need for attic storage. Easily accessible from carport, or house, or backyard, it is a handy place to store lawnmower, bicycles, garden tools, or other equipment. Area behind storage room can be used for outdoor living.

A handy snack bar or planning desk with overhead cabinets completes the function of the work center. Just right for quick snacks, breakfast-on-the-run, or for figuring out the grocery shopping list. Ideal spot for a telephone.

## AVAILABLE WITHOUT CARPORT

### MODEL 60 WITHOUT CARPORT (FULL BASEMENT)

1056 square feet — 3 bedrooms. Right or left hand models available.

### MASTER BEDROOM

Beautiful L-SHAPED window arrangement has been designed for smart furniture placement. Full size double wardrobe closet has extra storage space above. Size 11' x 13'6" — plenty of room even with twin beds.

### SECOND BEDROOM

Perfect for a teenager — and big enough if you want to double up two children in this room. Full size double wardrobe provides plenty of closet room. Shoulder-high windows permit wide choice of furniture arrangements — provide plenty of light and air as well as complete privacy.

### THIRD BEDROOM

Fix it up as a boy's room — or perhaps you would prefer combination study-guestroom. Large, roomy closet is at other end of room and shoulder-high windows can be projected out — provide maximum ventilation even in rainy weather. Built-in book case and storage unit.

### BATHROOM-LAUNDRY COMBINATION

Basementless Contemporary models feature a unique bathroom-laundry combination. Washer and drier can be located in bathroom. Like old-fashioned laundry chute which usually had access from bathroom, this arrangement facilitates easy handling of soiled clothing, bedding, and other laundry problems.

**POLLMAN  
HOMES**

# L-Shape...

BY THYER

... flexible design for convenient living

MODEL 30 (FULL BASEMENT) • MODEL 40 (NON-BASEMENT)

Careful planning has eliminated the family "traffic problem" in the L-SHAPE. Front door opens into charming entry hall with handy guest closet for coats and hats. Bedrooms and bath can be reached by hall eliminating traffic through living room. Note master bedroom is equipped with two wardrobe-type closets—each of the other bedrooms also have a wardrobe. Separate dining area. Handy snack bar separates kitchen from dining area. Study this design carefully . . . few homes can match it for convenient living. Left or right-hand models available.

FLOOR PLAN MODEL 30 and 35

2283-B FULL BASEMENT  
2583-B NON-BASEMENT

Proof that beauty lies in simplicity and that a home needn't be "fussy" to be attractive.

**MODEL** 2184 NON-BASEMENT  
2284 FULL BASEMENT  
2584 NON-BASEMENT

Large window-wall opens entire living room to the outdoors. A bright, cheerful place to live every day of the year.

**MODEL**

2182-B (non-basement)  
2282-B (full basement)  
2582-B (non-basement)

Striking combination of cedar shakes and attractive, random width vertical siding. Classic door and shuttered windows add to traditional charm of this model.

**MODEL**

2185-B (non-basement)  
2285-B (full basement)  
2585-B (non-basement)

Gable on end and extended roof across front of living room make this model distinctive on any lot.

**MODEL**

2186-B (non-basement)  
2286-B (full basement)  
2586-B (non-basement)

A trim beauty set off by rail fence across front.

**MODEL**

2187-B (non-basement)  
2287-B (full basement)  
2587-B (non-basement)

Gable across front of living room provides front entry and adds to the dignity of this model.

**MODEL**

2188-B (non-basement)  
2288-B (full basement)  
2588-B (non-basement)

Cedar shakes set off by vertical siding. Available in a wide choice of new color combinations.

**MODEL**

2189-B (non-basement)  
2289-B (full basement)  
2589-B (non-basement)

A modern masterpiece of simplicity and good taste. Fence across front serves as screen for window wall insuring living room privacy.

**MODEL**

21811-B (non-basement)  
22811-B (full basement)  
25811-B (non-basement)

Full porch across living room lends charm to this model and provides outside living area.

**MODEL**

21812-B (non-basement)  
22812-B (full basement)  
25812-B (non-basement)

A touch of western flavor wherever you build. Extended porch is both attractive and practical.

**POLLMAN  
HOMES**

**DISTINCTIVE  
DESIGNS**

**(2 bedroom models)**

MODEL 2129-B (NON-BASEMENT)  
MODEL 2229-B (FULL BASEMENT)

Ideal for a family with minimum bedroom requirements; these two-bedroom designs are generous in other details. Twelve distinctive elevations (9 shown here) are available either with or without basements. Full-size wardrobes in each bedroom, guest closet at front entrance, as well as hall closets, provide plenty of storage space. Birch kitchen cabinets are standard in all models.

FLOOR PLAN (NON-BASEMENT) MODELS  
798 square feet — washer and drier can be installed in kitchen for convenient laundry arrangement — outside storage area accessible from kitchen or rear porch.

FLOOR PLAN (FULL BASEMENT) MODELS  
768 square feet — laundering and heating facilities are located in basement.

**MODEL** 2121-B (non-basement)  
2221-B (full basement)

Gabled roof over living room window and front door adds dignity to this model and provides protected entrance.

**MODEL** 2123-B (non-basement)  
2223-B (full basement)

Large window area combined with distinctive door and trellis arrangement sets this house apart.

**MODEL** 2124-B (non-basement)  
2224-B (full basement)

Vertical siding complimented by careful window and door placement is secret of this model's simple charm.

**MODEL** 2126-B (non-basement)  
2226-B (full basement)

Cozy behind its white rail fence, this is a friendly home in every sense of the word.

**MODEL** 2127-B (non-basement)  
2227-B (full basement)

Cedar shakes are a perfect background for the handsome, gabled facade.

**MODEL** 21211-B (non-basement)  
22211-B (full basement)

Vertical siding and cedar shakes in a charming wainscoted combination.

**MODEL** 2128-B (non-basement)  
2228-B (full basement)

Small home that looks big — several new color combinations to choose from.

**MODEL** 21210-B (non-basement)  
22210-B (full basement)

Wood trellis form attractive portico across front — providing sunshade for living room window and sheltered entry.

# Why a **HOME BY THYER** is your best buy

## *designed by Richard B. Pollman*

Few people who buy homes in the medium and low price range can afford the services of a top designer. This is one of the advantages of a Thyer constructed house. Designed by the

noted designer, Richard B. Pollman, these homes are as up-to-date in their styling, as the clothes you wear or the car you drive. You will enjoy and be proud of a Pollman Home.

## **EACH DESIGN CAREFULLY ENGINEERED**

Once it was that a carpenter took blueprints and, armed only with experience and faith in his craft, set out to build you a house. In the Thyer plant today, we are more thorough. Trusses, walls and other sections of a house are carefully gone over by men with years of experience in building. Better ways of putting parts together are considered, tried and tested before they ever become part of a Thyer constructed home.

## **Precision Factory Assembly Means a Better Home . . . for less money**

Thyer's method of construction is equal to or better than a top-notch carpenter would do on a quality job. To proven construction methods, we have merely applied the time and money-saving techniques of mass production. Lumber is cut to precise lengths, and assembled under rigid inspection. Whole walls are built and nailed in jigs—absolutely square and true. And, very important, this method of construction permits a degree of quality control not attainable by any other method.

The result is that Pollman Homes erected on your lot by skilled crews meet standard building codes everywhere. They meet both FHA and VA requirements and have been commended by Parent's Magazine. There is no finer house available on the market in its price range.

what about

## THYER construction?

**FRAMING . . .** Exterior walls and interior partitions are 2 x 4 on 16-inch center, with double 2 x 4 top plate. Corner bracing is used in all outside corner panels to provide added rigidity of the frame.

**ROOF TRUSSES . . .** All Pollman Homes with the exception of contemporary models, have trussed roofs. This is the same type of construction that has been used for years in heavy industrial and commercial buildings. The truss provides an even distribution of the roof load over the entire roof area. Thus the load is carried only by the outside walls. The elimination of bearing partitions gives Pollman designs maximum flexibility in planning room arrangements.

**FLOOR SYSTEM . . .** Floor framing is 2 x 8 — on 16-inch centers. A double row of bridging, providing additional strength; subfloor is nominal 1-inch sheathing; finish floor  $\frac{3}{8}$  — 2  $\frac{1}{4}$ -inch face select hardwood in all principal rooms with  $\frac{3}{8}$ -inch plywood in kitchens, baths, and utility rooms.

**EXTERIOR WALL FINISH . . .** Double course red cedar shingles applies over 1-inch nominal sheathing. The use of double course shingles provides not only a warm, tight home, but also creates an attractive horizontal shadow line. Vertical siding is also used on some models to create special design effects.

**INTERIOR WALL FINISH . . .**  $\frac{1}{2}$ -inch Gypsum board with joints "welded" with tape and Gypsum cement. This assures a wall that is virtually crack-free and can be decorated with any of the modern wall treatments. The use of this type of interior wall covering also eliminates the introduction of moisture into the house when finishing interior walls. Sidewall insulation is available at your option.

## What about financing?

Like most families you will probably need a mortgage loan to purchase a home. Basically, two types of loans are available, those where the lender is insured or guaranteed against loss by a government agency such as FHA and VA, and, those without such protection. The insured loans usually afford the lowest interest rate and a longer time to repay.

For information about how to obtain financing, contact your local Pollman Home Builder or write to the nearest office of the Federal Housing Administration or Veterans Administration (if you are an eligible World War II or Korean Veteran) for a home buyer's guide pamphlet.

## How much house do you need?

The number of persons in your family and their ages, practically decide the number of bedrooms, size of dining space, etc., your family needs. However, other factors are quite important. With average family size increasing, your house at resale having but one bedroom will not sell as well as the home with two or three bedrooms —

most families want the latter. It is also easier and less expensive to get that extra bedroom now than to try to remodel and add it later. It is not so much the number of square feet of floor area that a house contains, rather it is the amount of livability and utility of space that has been designed into a home that counts.

## How much can you afford?

The downpayment you can make and the size of monthly payment that you can carry comfortably, added to other family expenses, largely determine the price of the home you can afford. Add to your mortgage payments, real estate taxes, hazard insurance, heating and utilities (electricity, water, gas, etc.) special services (e.g. garbage collection in rural areas), and maintenance, and you have the total

cost of home ownership. For the average family, if this figure is less than 28% of the monthly income (take-home pay), it can be comfortably carried. At first, a major item in home payments is the interest on the mortgage loan, but this steadily decreases and an increasing amount is applied against principal. This equity in your home can be considered in the same light as savings.

## How much will it cost?

The size of the downpayment required to purchase a new Pollman Home varies from area to area and according to the type of loan you obtain. The chart shown here, however, can serve as a rough guide as to what your monthly payments will be, depending upon the size of the loan you require, the length of the mortgage and the interest rate. Monthly payments (including principal and interest) shown here

are based upon a thousand dollars, so that you can easily figure any larger amount. For example, let us take a home costing \$10,000 on which the buyer made a downpayment of \$1,000 and required a loan of \$9,000. If the interest rate was 5% and the length of the mortgage 20 years, monthly payments could be 9 x \$6.60 or \$59.40 per month.

MORTGAGE LOAN MONTHLY PAYMENT TABLE (Based on each \$1,000 of loan)					
REPAYMENT PERIOD					
INTEREST RATE	10 years (per \$1,000)	15 years (per \$1,000)	20 years (per \$1,000)	25 years (per \$1,000)	30 years (per \$1,000)
4½ %	\$10.37	\$7.65	\$6.33	\$5.56	\$5.07
5%	10.61	7.91	6.60	5.85	5.37
5½ %	10.86	8.18	6.88	6.15	5.68

In addition to the figures shown above are initial loan expenses and fees for services which vary by community and type of lender, but probably will be about 2 per cent of the loan you obtain. For FHA loans, use the 5% table. (FHA mortgage interest is 4½% plus an additional ½% for mortgage insurance.)

### **Precision Cut and Assembled**

One of the important advantages of Thyer factory-assembly method is the close quality control maintained. All lumber is precision cut to exact specified lengths. These pieces are assembled under much closer supervision than is possible when all work is done on the site.

The inevitable result is, as hundreds of builders will testify, a better, sounder house than can be built by any other method.

### **Delivered by Truck**

Pre-assembled sections of your house are shipped by truck from the Thyer factory. Houses are scheduled out so that in most cases the truck arrives at your lot about 8:00 A.M. In almost miracle swiftness, your home begins to take shape before your eyes. Usually the house is up and the door can be locked by quitting time the same day.

### **Ready for Occupancy**

Plumbers, electricians and other craftsmen take over the second day. Under normal conditions, a home is completed, ready for occupancy in about six weeks, frequently less, from the day the house was delivered to site — about 1/3 the time normally required.
